

2N intercom and access unit licensing

Now free and easy!

Beginning April 1, 2021, all advanced features* that previously required a paid license will be available at **no cost** for 2N IP intercoms and 2N IP access unit devices.

We have simplified the process to obtain the license, reducing the time and resources needed to decide which license you need, purchase the right license, and manage the deployment.

With this new licensing model, it is easy to enjoy innovative features, such as video streaming to any device, integration with third-party solutions, elevator control and customized functionality.

There are two ways to secure your free license:

Option 1

Connect the intercom or access unit to the internet, the license will be downloaded automatically.

Option 2

If you are not connecting to the internet, follow these three steps:

- > Log into the [Axis license key registration portal](#)
- > Follow the directions, adding in the serial number of the intercom or access unit and choose 2N "Free License"
- > The license code will be generated, and can be copied and pasted into the firmware of the device

That's it!

Quick, easy and cost-effective – we hope you enjoy this upgrade and it brings value to you and your business.

For inquiries, please contact your local Account Manager.

Axis Communications distributes and supports 2N products and solutions in the US, Canada, Mexico, Caribbean, and Central and South America.

*Does not include Informacast and Access Commander licensing and is not valid outside of the Americas region.
